

1.find maximum value in an array?

```
#include <stdio.h>
```

```
int main() {  
    int arr[] = { 23, 12, 45, 20, 90, 89, 95, 32, 65, 19 };  
  
    int n = sizeof(arr) / sizeof(arr[0]);  
    int max_value = arr[0];  
  
    for (int i = 1; i < n; i++) {  
  
        if (arr[i] > max_value) {  
            max_value = arr[i];  
        }  
    }  
    printf("The maximum value in the array is: %d\n", max_value);  
  
    return 0;  
}
```

2.calculate sum of array elements?

```
#include <stdio.h>
```

```
int main() {  
    int n, i, sum = 0;  
  
    printf("Enter the number of elements: ");  
    scanf("%d", &n);  
  
    int arr[n];  
  
    printf("Enter %d elements:\n", n);  
    for (i = 0; i < n; i++) {  
        scanf("%d", &arr[i]);  
        sum += arr[i];  
    }  
}
```

```
}

printf("Sum of array elements: %d\n", sum);

return 0;
}
```

3.reverse array in c?

```
#include <stdio.h>

int main() {
    int n;

    printf("Enter the number of elements: ");
    scanf("%d", &n);

    int arr[n];

    printf("Enter %d elements:\n", n);
    for (int i = 0; i < n; i++) {
        scanf("%d", &arr[i]);
    }

    printf("Original array: ");
    for (int i = 0; i < n; i++) {
        printf("%d ", arr[i]);
    }
    printf("\n");

    for (int i = 0; i < n / 2; i++) {
        int temp = arr[i];
        arr[i] = arr[n - i - 1];
        arr[n - i - 1] = temp;
    }
}
```

```
printf("Reversed array: ");  
for (int i = 0; i < n; i++) {  
    printf("%d ", arr[i]);  
}  
printf("\n");  
  
return 0;  
}
```
